## PEUGEOT 508

MOTION & EMOTION

PEUGEOT

## PEUGEOT 508 THE ROAD IS ITS TERRITORY

Take on everything that the world has to offer in the Peugeot 508. Brimming over with vigor and style, this new vehicle is set to turn heads wherever it goes.

Completely redesigned to deliver extra power and personality, the 508 features a more expressive appearance inside and out. The assertive exteriors are balanced by elegant interiors designed for comfort and sensory pleasure. The latest technology seeks to deliver a better driving experience at all times. Peugeot's signature headlights, shaped like three lion's claws, also stamp their authority on this new and improved model.

Let the 508 rule the road the way it knows best, and experience unparalleled sensation the Peugeot way.

### ASSERTIVE STYLING

Concentrated and fluid, the 508 reinvents the standards for a grand tourer with its contemporary design. The front grille rises vertically to prominently feature the signature Peugeot lion, and boasts a more horizontal bonnet. The redesigned bumper also supports the silhouette while strengthening its protective function.

### SENSATION INSIDE AND OUT

The 508 effortlessly combines dynamic elegance and exceptional comfort in its luxurious interiors. Supple leather seats bring a more pleasurable experience to driver and passengers alike. The passenger compartment sports refined trims and furnishings combined with chrome, gloss black, satin black, and leather.

The 508 has all the hallmarks of a refined world, without being ostentatious.

### ENSURING SAFETY WITH TECHNOLOGY

Journeys become safer in the 508. Its luxurious interiors include innovative onboard technology to make driving easier, including the color head-up display and 7-inch touchscreen.

Peugeot exceeds global safety standards in the 508. The rear camera activates automatically when reverse gear is selected to provide enhanced ease of use, while the audible and visual front and rear parking assistance notifies the driver of the distance separating it from an obstacle. The blind spot monitoring system uses an orange LED light in the exterior mirror to alert the driver when a vehicle is present in the blind spot.
